DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 7 rejected under 35 U.S.C. 102(b) as being anticipated by Rickard (USPN 4,736,366).

Rickard (USPN 4,736,366) teaches the limitations of Claim 1 as follows; an abnormality detection device for detecting an abnormality in a communication bus, the device comprising of a timer connected to the communications bus (30&32;See Figure 2), and a comparator outputting an abnormality detection signal indicating an in said communication bus when the time measure by the timer surpasses a certain threshold. (Col. 4, lines 3-17)

Claim 5 has all the limitations of claim one with the addition of an additional timer (See Figure 2) and a register (Col.2, lines 61-62) for adding the time measured by one of the timers (30& 32;Col.2, line 63)

With regards to Claim 7, Rickard (USPN 4,736,366) teaches a microcomputer connected to a bus comprising of a timer to measure a transmission time in a communications bus and a comparator to compare the time measure to a threshold value (See Figure 2).

Regarding claims 2-3, Rickard (USPN 4,736,366) teaches initializing the timer and comparator. (Col. 4, line 5 & line 66)

Regarding Claims 4, Rickard (USPN 4,736,366) teaches plurality of registers and a means for selecting values stored in those registers. (12; Figure 2)

Allowable Subject Matter

Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
